

1. Our company has obtained certifications such as ISO 9001 and OHSAS 18001 for environmental protection and industrial safety, establishing a high-quality work environment that prioritizes environmental protection and safety.
2. In accordance with the characteristics of our engineering operations, we have established standard operating procedures and manuals, and require employees to strictly follow company regulations when carrying out engineering operations. We also strive to enhance the safety and health risk control of the operating environment, activities, instruments, or equipment, and regularly conduct measurements of the operating environment. Currently, we have obtained certification for the OHSAS 18001 occupational safety management system.
3. Our company periodically promotes environmental awareness among employees, advocating for activities such as energy conservation and carbon reduction, water and electricity conservation, and the recycling of waste paper.
